Product Specification Blend of glycols with additives

Chemical name : Blend of glycols with additives

Einecs : Gemisch

Synonym : Mischung, Lohnfertigung,

General informations : The precise blending of glycols with additives is an important part of our services. We produce blends according to customer-specific formulations, with the customer either supplying the raw materials themselves or us procuring them on their behalf. Our blending processes are accurate to the kilogram and cover batch sizes from 100 kg to several tons. Depending on requirements, we can heat and homogenize the blends to ensure optimal consistency.

Application : Mixing is carried out manually or via our automatic mixing system. Additivation or emulsification with components specified by you can, by prior arrangement, be carried out before or during mixing in accordance with your specifications. The labels can be produced by us according to your specifications. Filling and packaging are carried out according to your specifications.

Hazard Statements : We can currently only mix hazardous materials or strongly odoriferous liquids to a limited extent. Before confirming an order, we require a safety data sheet for the raw materials to be used. If such an SDS is not available, our dangerous goods officer can assist you in preparing the safety data sheets.

Product categories : SERVICES, tolling manufacturing
