Product Specification Bottling of solids

Chemical name :	Bottling of solids
chemical name :	Filling of solids into small containers starting at 100 grams
Synonym :	Lohnabfüllung Pulverabfüllung, Granulatabfüllung, Musterabfüllung
General informations :	We repackage solid or pasty products from sacks or drums for you on a contract basis, filling them into buckets according to your specifications and reliably adhering to specified net weights. In addition, we offer labeling and order picking, including palletizing. If desired, we can also assist you in sourcing raw materials.

Application :

Manual filling: Manual filling is the most cost-effective option for smaller quantities, but it is also the most time-consuming. During manual filling, the product is filled into containers by hand.

Automatic filling line: The automatic filling line is the fastest and most efficient option, but it also involves setup and cleaning costs, which make filling economical only from a larger quantity onward. During automatic filling, the product is filled into containers by machine.

Labels: Self-adhesive labels can be supplied by you or produced by us according to your specifications. If you supply labels, you must ensure that they comply with legal requirements. If we create labels for you, we will follow your specifications.

Billing: Billing is based on unit quantity, measuring unit, or as agreed. We will prepare a customized offer that meets your individual requirements.

We hope this information is helpful. Please do not hesitate to contact us if you have any further questions.

Hazard Statements :

Unfortunately, we can only fill a limited range of hazardous goods or highly dusty solids. Before filling, we require a safety data sheet for the products to be filled. If such a safety data sheet is not available, our hazardous goods officer can assist you in preparing the safety data sheets.

Product categories :

SERVICES, repacking services
