Product Specification Cold cleaner based on renewable raw materials

Chemical name :	Cold cleaner based on renewable raw materials
chemical name :	Environmentally friendly cleaners based on vegetable oil esters
Density :	je nach Produkt
WGK :	1

General informations :

Cold cleaners based on renewable raw materials are ester-containing or solvent-based cleaning agents used to remove oil, grease, dirt, wax, and tar-like residues, in which the majority of the raw materials come from renewable sources.

In public product information, such products are sometimes referred to as “bio cold cleaners” or “based on renewable raw materials.” The exact composition varies depending on the product and application area.

We manufacture these products on a white-label basis for our customers.

Application :

Typical applications of cold cleaners based on renewable raw materials include workshops, industry, metalworking, vehicle care, as well as general degreasing and cleaning tasks on machines, engines, tools, workpieces, floors, and painted and primed components.

Depending on the product, application is usually by spraying on, brushing on, wiping, dipping, or spraying.

Hazard Statements :

Plant oil ester-based environmentally friendly cleaners are usually not classified as hazardous substances.
