Product Specification di sodium sebacate CAS No. : 17265-14-4

Chemical name :	di sodium sebacate
chemical name :	sebacic acid, di sodium salt
Appearance :	white, cryst.
Moisture :	max 1,5 %
Packing :	bags
Einecs :	241-300-3
CAS No. :	17265-14-4
WGK :	1

Synonym :	pH 7-9
General informations :	<p>Disodium sebacate is a white, crystalline powder with a high purity of over 96%. It is commonly used as an additive in the plastics and lubricants industries.</p> <p>We offer disodium sebacate in various package sizes to meet the different requirements of our customers. Upon request, we can also fill the product into special containers.</p> <p>This product is used by SysKem Chemie as a raw material for the production of customer-specific formulations. If you would like us to produce formulations with this product for you, please feel free to contact us.</p>
Application :	Disodium sebacate is primarily used as a stabilizer and plasticizer in plastics manufacturing. It improves the flexibility and durability of plastics and increases their resistance to environmental influences. Customers benefit from the product's high purity and quality, which can also be used in custom formulations.
Hazard Statements :	Since disodium sebacate is not a hazardous material according to ADR and does not require any special GHS labeling, no special safety measures are necessary. Nevertheless, we place great importance on ensuring that all products are labeled and handled safely. Our employees are trained in handling chemical substances to ensure the highest safety standards.
